

CV-P10

INDOOR / OUTDOOR LED DISPLAY

The wait is over. The CV-P10 (10mm True Pixel Pitch) LED display system is Hawaii's solution for all indoor and outdoor rental installations.

The CV-P10 was custom fabricated for Hawaii Stage and Lighting Rentals to be the most versatile LED display available. The modular system and quick assembly makes the CV-P10 the answer for a nearly limitless variety of custom applications. Delivering rich colors and crisp images means the CV-P10 is not just limited to outdoor applications. Although the rugged IP65 rating means this is no weather-shy LED display.

Each system comes equipped with the LVP601S Video Processor, which will take almost any input and allow it to be shown in broadcast-quality playback. Custom fabrication means a lot when it comes to the CV-P10: mobility, serviceability, lightweight housing, low power consumption, and high contrast.

Pixel Pitch	10mm
Max Brightness	≥ 5500 NIT
LED Configuration	1R 1G 1B (High Intensity Red)
Pixel Density	10000/m ² (930/ft ²)
Red Wavelength	625 ± 5
Green Wavelength	522 ± 3
Blue Wavelength	567 ± 3
Hor. Viewing Angle	140°
Vert. Viewing Angle	60°
Power Consumption	Maximum: 750w/m ² Average: 400w/m ²
Weight / Tile	32Kg (71lbs)
Refresh Rate	1200Hz
Ruggedness	Front: IP65 Back: IP43
Temperature Range	-15 – 55°C (5 – 131°F)
Certification	CE
LVP601S Input Compatibility	Composite, S-Video, VGA, DVI, SD/HD Component, HDMI, SDI
Dimensions	Width: 960mm (37.75") Height: 640mm (25.25") Depth: 180mm (7.125")
